HLB PEP

SYNTHESIZING THERAPEUTIC FUTURE

Key Technology

HLB PEP supplies various types of high-quality peptides promptly by applying our optimal synthesis technology and extensive experiences in the peptide synthesis.

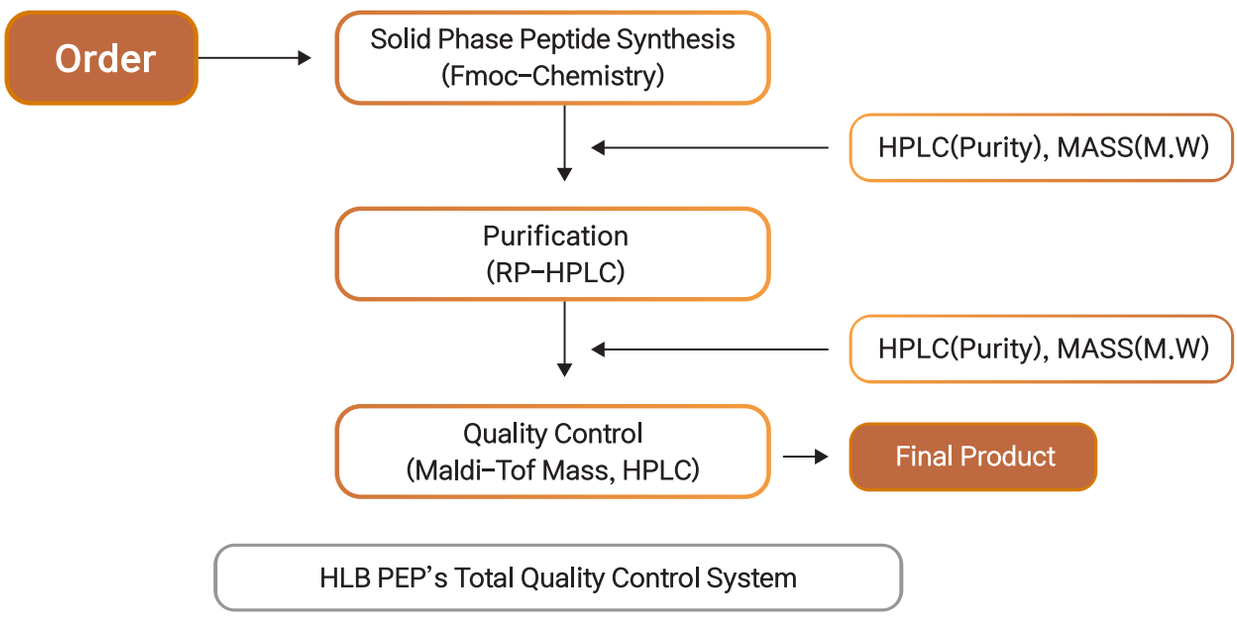

We manufacture high-quality custom-made peptides by applying our thorough product managing system (ISO 9001, 14001, 45001, GMP Certificated) in the synthesis and purification of peptides, and we supply the peptides demanded by customers by applying custom-made synthesis and purifications according to the level of difficulty in the synthesis and types of modification.

Custom Peptide Synthesis Service

HLB PEP Synthesizing Therapeutic Future

- We offer peptide synthesis with faithful value
- >80%, >95%, >98% purity grade
- mg ~ kg scale
- Academic, pharmaceutical and industrial use

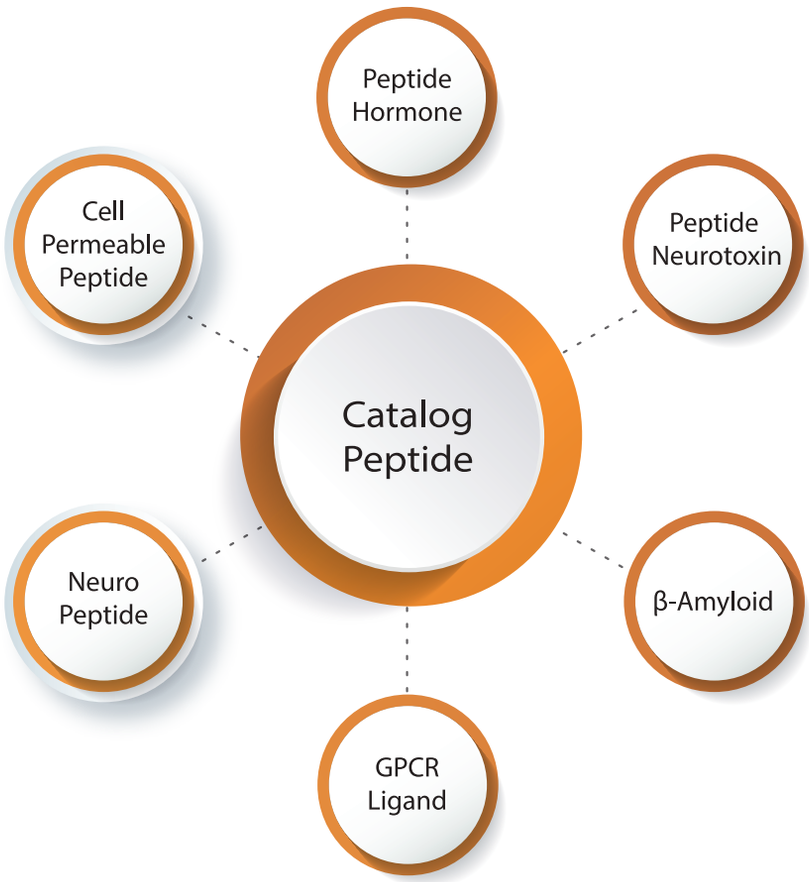

Modification

N-terminal	Side Chain	C-terminal
Acetylation/Biotinylation		Amidation
Fluorescence Dye (FITC/Cy3/Cy5 and its derivative)		Esterification
DNP (2,4-D-Niroanilide)		pNA (p-Niroanilide)
Dabcyl/Dabsyl/Dancyl	Phosphorylation (Ser, Thr, Tyr)	AMC (Aminomethylcoumarin)
Fatty Acid	Disulfide Bonds	MAP (Multiple/Antigen peptide)
PEG	Cyclization	EDANS
KLH/BSA Conjugation to Antibody Production		

Catalog Peptide Service

HLB PEP Synthesizing Therapeutic Future

Cosmetic Peptide

Name	Function in cosmetic products
Acetyl Hexapeptide	Relaxes facial wrinkles, reducing the degree of existing wrinkles.
Palmitoyl Hexapeptide	Wrinkle prevention, wrinkle repair and eye contour care.
Palmitoyl Tetrapeptide	Anti-aging, wrinkle smoothing, and cutaneous barrier repair.
Palmitoyl Pentapeptide	Anti-wrinkle and collagen production stimulation.
Copper Tripeptide	Wound healing and revascularization of tissues.
Palmitoyl Tripeptide	Anti-aging and anti-wrinkle effects and cutaneous restructuration and repair.
Curcumin-Argireline	Wrinkle improvement, promotion of pro-collagen synthesis, acne skin suitability, skin moisturizing
Curcumin-GHK	Wrinkle improvement, promotion of pro-collagen synthesis, acne skin suitability, skin moisturizing

GMP Service

HLB PEP Synthesizing Therapeutic Future

GMP Bulk peptide: from ~g to ~kg scale

- Bulky-scale solid & solution phase synthesis
- Proportionately scaled HPLC purification
- Lyophilization
- Cleanrooms from class 100,000 to 10,000
- QA/QC and regulatory support
- Expertise in all production and purification techniques
- Dedication to quality and GMP compliance

Our standard GMP specifications include

- Appearance
- Solubility
- Identity (Via mass spectral analysis)
- Related substances (HPLC)
- Assay (as mass balance)
- Counter-ion contents
- Moisture content
- Peptide content (by N%)
- TFA content
- Chloride content
- Residual organic solvents
- Bioburden
- Endotoxin
- Other API-specific parameters

Generic Peptide APIs

Peptide Name	Application
Leuprorelin	Prostate Cancer
Desmopressin	Diabetes Insipidus
Ganirelix	GnRH antagonist, IVF

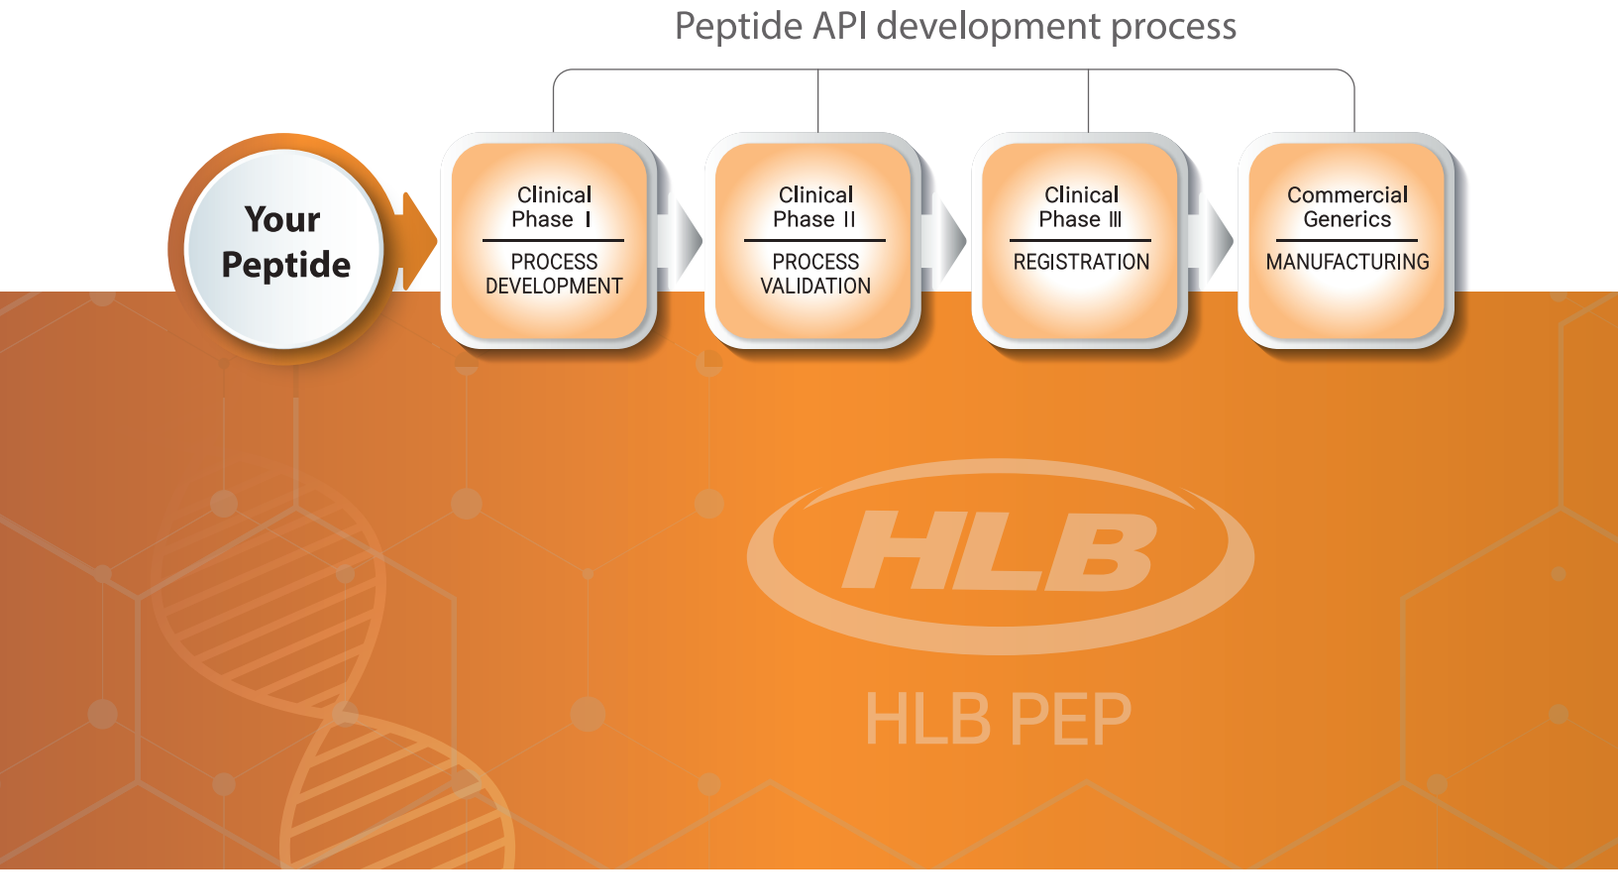

Under Developing APIs

Peptide Name	Application
Liraglutide	Type 2 diabetes, Obesity
Lanreotide	Acromegaly
Semaglutide	Obesity
Ziconotide	Neuropathic pain
Vasopressin	Antidiuretic effect, Vasoconstriction

CDMO Service

HLB PEP Synthesizing Therapeutic Future

Looking for a partner to develop peptide drugs?

Process Development & Validation

- Characterization
- Analytical Methods Validation
- Process Validation
- Working Standard Preparations
- Three Batches Validation

Registration & Manufacturing

- ICH Stability
- Regulatory Support
- CTD/DMF Preparation
- Commercial Manufacturing
